

GT (1)
Pred (1)

0.68

The image is a low-resolution aerial photograph of a forest. A large, irregularly shaped area in the center-right is outlined by a dashed red line, representing the ground truth (GT) bounding box. A solid green line outlines a predicted bounding box (Pred) that is slightly smaller and shifted to the left relative to the GT box. The text '0.68' is displayed in the top-left corner of the green box, indicating a confidence score or intersection-over-union metric. The background is a dense, textured green, representing the forest canopy.
